Total-Body Training

Free Wheel X-Bike 1000

The X-Bike 1000 is the only free wheel indoor cycle that features TriXter's patented X-Bar handlebar mechanism that allows the rider to functionally engage the upper body and core musculature, while the legs do the pedalling.

This exercise offers enhanced total-body fitness benefits while bringing the natural movements of outdoors cycling indoors. The handlebar movement also promotes improved balance and coordination functions further enhancing the effectiveness of regular X-Bike rides.

The use of a freewheeling drive train allows the rider to 'coast' facilitating superior training flexibility and unrivalled safety while the 32-position GripShifter makes for effortless pedal resistance modulation. Riding X-Bike is as easy and natural as riding a bicycle outdoors and the fitness benefits are truly remarkable. It's total-body biking and it's far from stationary!

Frame & Parts

- Commercial Grade frame
- X-Bars
- Comfort Seat
- Stainless Hardware
- Straight Handlebars
- Metal Bar Ends
- Water Bottle Bracket
- Transport Wheels
